Breathe Healthy Live Healthy...

Indoor Unit LED COLOUR Codes:

RED : Power ON (Initial 10 Seconds)
GREEN : WIFI Configuration Mode (2 minutes)
RED - GREEN : Sensors Calibration (2 Minutes)
BLUE : O2 pumping in progress
BLUE - ORANGE : WIFI connection mode
RED - BLUE blinking : Indoor unit not in communication range with Outdoor unit or outdoor unit power OFF
BLUE wave : Selected oxygen level achieved
RED blinking : Outdoor unit Unhealthy

Note:
1. The LED Light of the Indoor Unit can be switched ON/OFF Through Mobile APP
2. The Outdoor Unit can be turned ON/OFF through Mobile APP
3. Upon Indoor unit Power ON it takes 5 Minutes to update data on the APP
4. O2 Level can be selected between the 20% - 25% range, upon O2 Level reaching selected level the outdoor unit stops pumping O2
5. It takes 1 hour time to fill 1% O2 in the room depending on model and room size
6. It is advised to close doors and windows for optimal results
7. O2 is not flammable but it inflates fire upon concentrated pumping on fire
8. Oxygen purity from the outdoor unit may fluctuate from 40% to 80%
9. When not in use it is advised to power off the Outdoor unit
10. The communication int-revel between
    A) server and Indoor unit is 1 Minute
    B) Indoor Unit and Outdoor unit is 30 Seconds
       therefore there may be delay in the execution of commands
11. Warranty certificate can be accessed through login page of URBOX.IN
